**Geometric Properties**

**CEMCO TAB TRACK** provides a non mechanical (screwless) stud-to-track attachment for metal stud wall framing. A series of 1” long tabs are evenly spaced across the track’s legs providing flexibility to regular and irregular layout. Once the studs are nested within the **TAB TRACK** the tabs may be pushed inward on either side of the stud to prohibit lateral movement while maintaining vertical deflection. Available in 33 mil thicknesses, tab track is manufactured from G40 hot-dipped galvanized steel. G60 and G90 are available only upon special request and will require extended lead-times.

### Steel Thickness

</tbody>
</table>

**Notes:**
1. Uncoated Steel Thickness. Thickness is for carbon sheet steel.
2. Minimum Thickness represents 95% of the design thickness and is the minimum acceptable thickness delivered to the job site, based on Section A4.3 of the 2012 AISI.

**Color Code (painted on ends):**
- 33-mil: White

**ASTM & Code Standards:**
- A1003, A653, A924, C645, C754
- 2012/2015 IBC
- 2010/2013 CBC
- 2012 AISI
- U.S. Patent 9,551,148

**LEED v3 for Building and Design Construction**
- MR Credit 2: Construction Waste Management.
- MR Credit 4: Recycled Content.

**LEED v4 for Building and Design Construction**
- MR Prerequisite: Construction and Demolition Waste Management Planning.
- MR Credit: Construction and Demolition Waste Management.
- MR Credit: Building Life-Cycle Impact Reduction, Option 4.

**CEMCO cold-formed steel framing products contain 30% to 37% recycled steel.**
- Total Recycled Content: 36.9%
- Post-Consumer: 19.8%
- Pre-Consumer: 14.4%
